

# CIDAL P

Target. Destroy. Restore.

When pathogenic invaders overtake your body's terrain, gentle isn't enough—precision is required. Cidal P is a powerful 14-day intensive protocol designed to support the body's natural defense against parasites and unwanted gut organisms. Using a potent spectrum of plant-based compounds (wormwood, black walnut hull, andrographis), immune-priming mushrooms, targeted enzymes, minerals, and clinically relevant probiotics/postbiotics—this formula helps disrupt parasite cycles, support natural detox pathways, and restore terrain resilience. A powerful reset for patients who need real intervention, not a casual cleanse.
